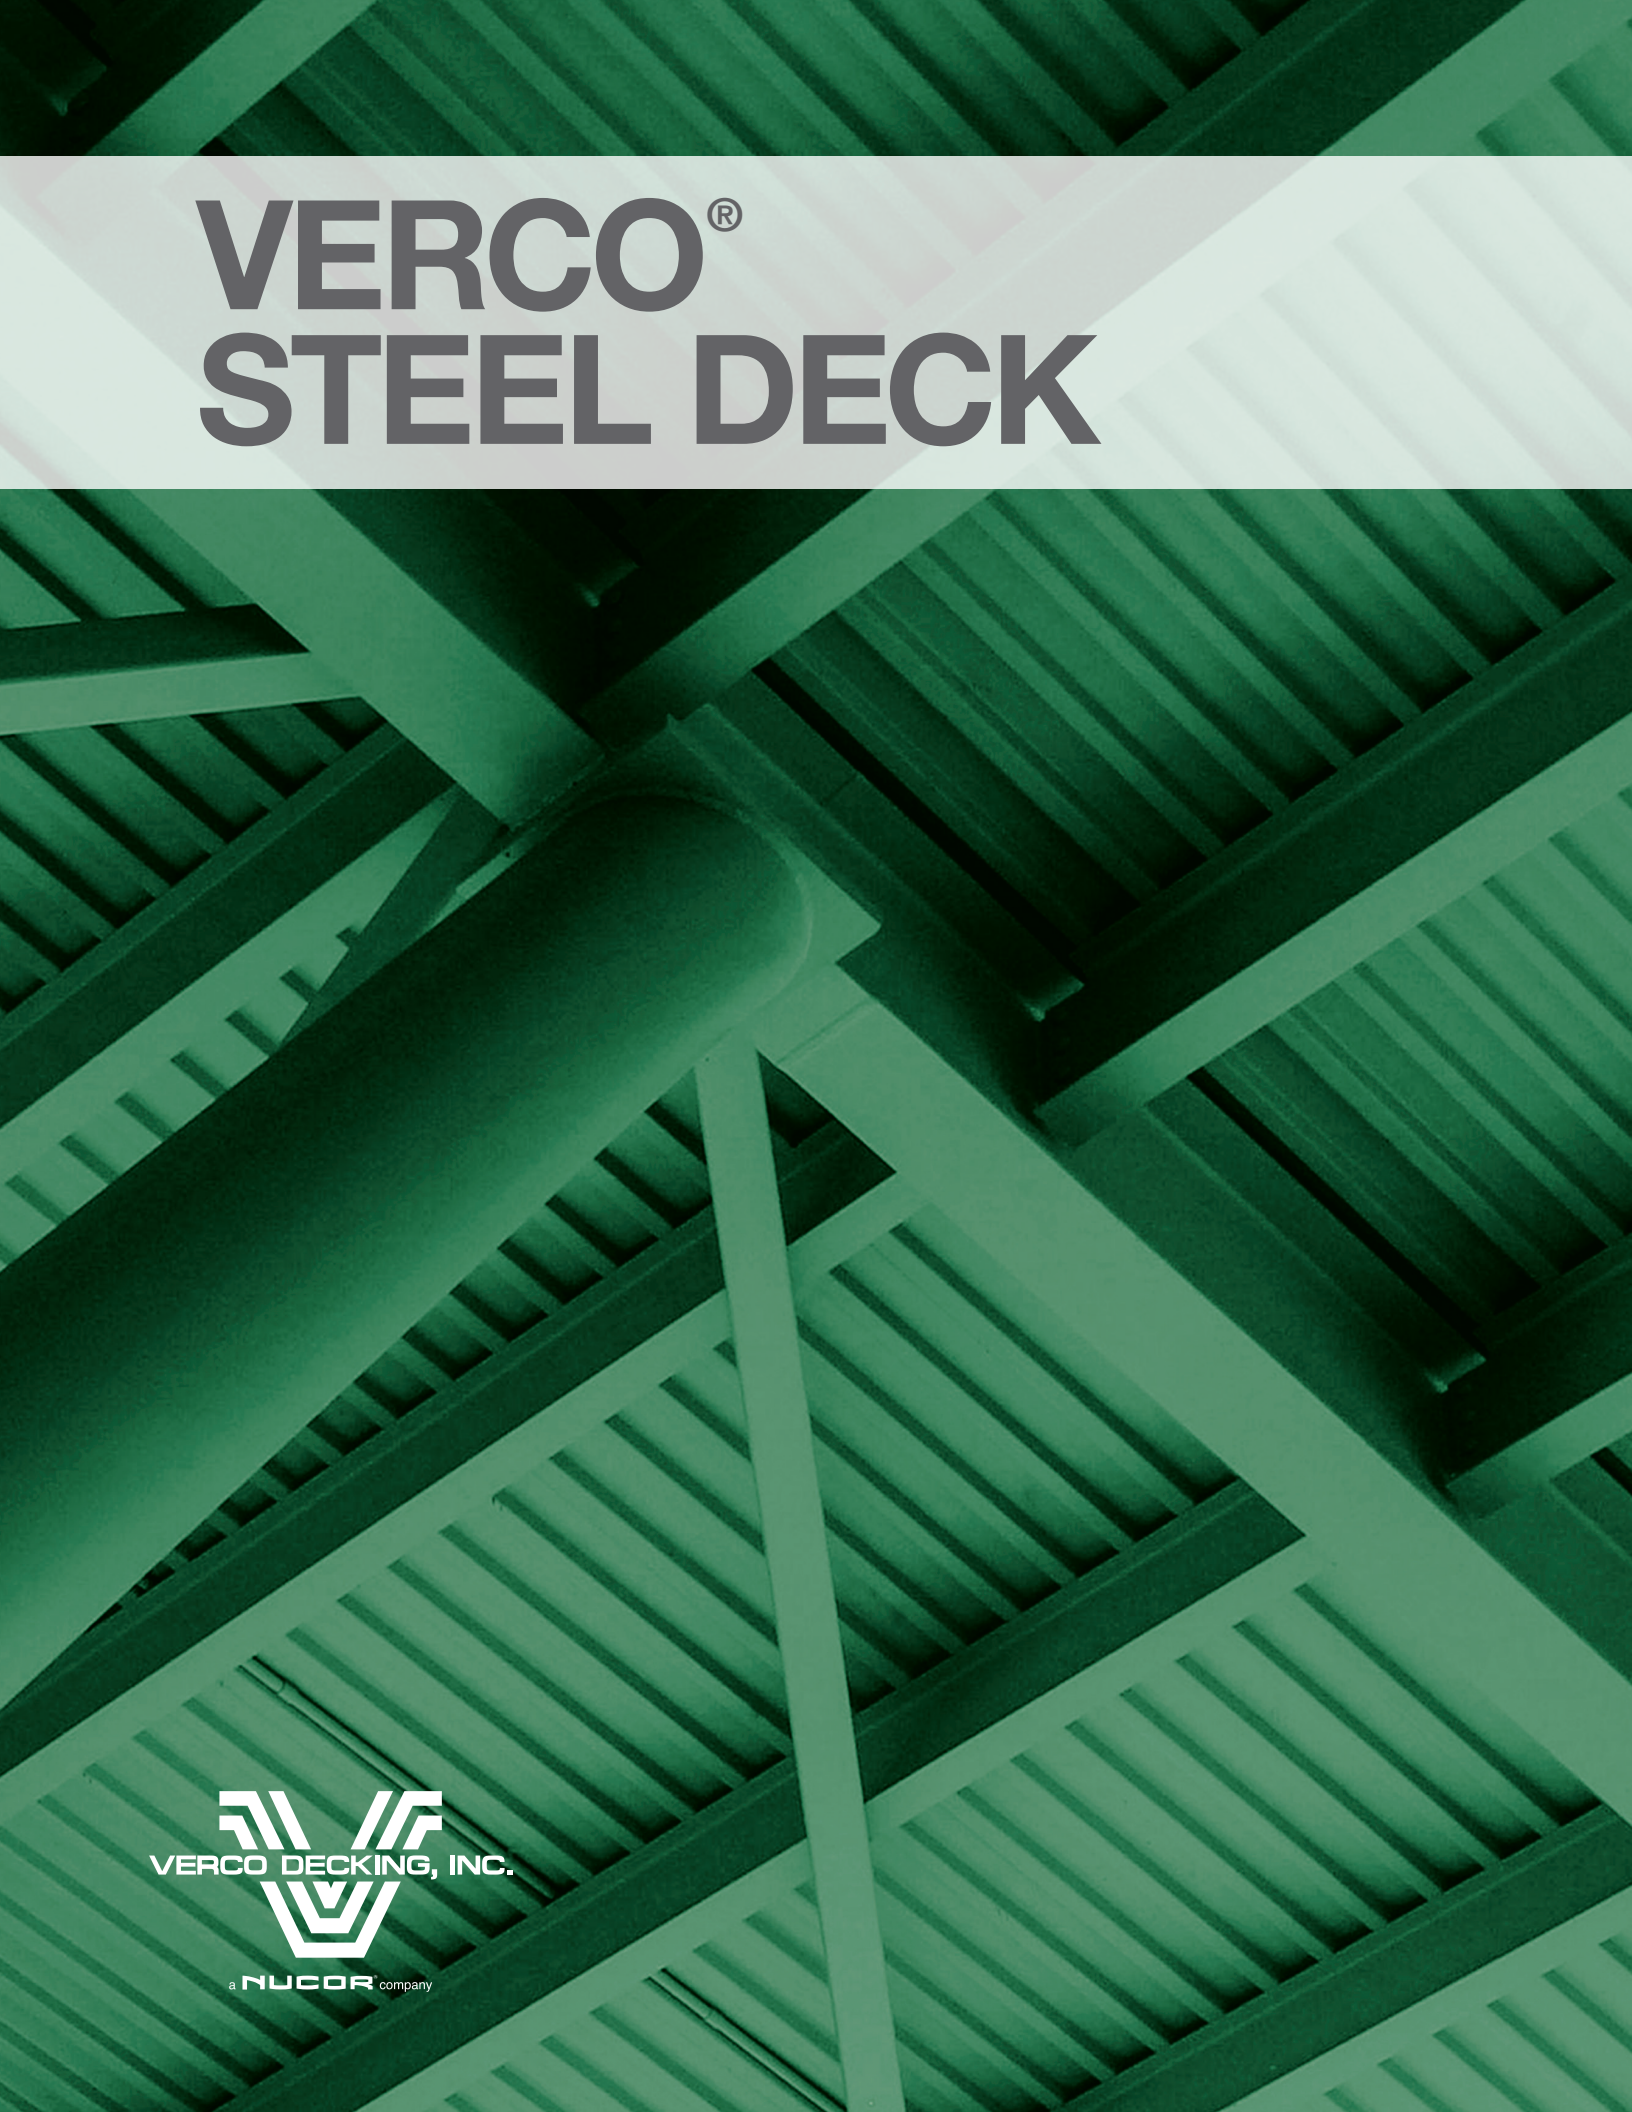
VERCO®
STEEL DECK



VERCO DECKING, INC.

a NUCOR company

PUTTING THE POWER IN YOUR HANDS

Verco makes it easy for you to generate steel deck product data specific to your project with our Online Design Tools, helping you increase project performance and reduce project costs. They're compliant with 2021 IBC/2022 CBC, include detailed supporting data for transparency, and incorporate the latest research in referenced IAPMO evaluation reports.

ROOF DECK TOOLS - FOR BARE DECK

BARE DECK DIAPHRAGM: Calculate the bare deck diaphragm shear and stiffness for your configuration based on AISI S310 and current IAPMO evaluation reports.

BARE DECK UNIFORM LOAD: Determine the uniform gravity and wind-uplift loads for your bare deck configurations.

Explore additional tools to design bare deck for **Bare Deck Wall Anchorage** and to calculate a **Bare Deck Concentrated Load**.

FLOOR DECK TOOLS - FOR CONCRETE-FILLED DECK

COMPOSITE DECK-SLAB SUPERIMPOSED LOAD: Calculate composite deck-slab strength and maximum unshored span tables for your composite deck configurations.

DECK-SLAB DIAPHRAGM: Calculate diaphragm strengths and stiffness for deck-slabs with plain concrete, or concrete reinforced with Bekaert Dramix steel fibers, WWR or rebar.

UNSHORED CONSTRUCTION SPAN: Calculate maximum unshored construction spans and cantilevers for thick slabs based on your design criteria.

Explore the **Composite Deck-Slab Superimposed Load** tool further to find multi-span **composite deck-slab design** and **composite deck-slab vibration analysis**.

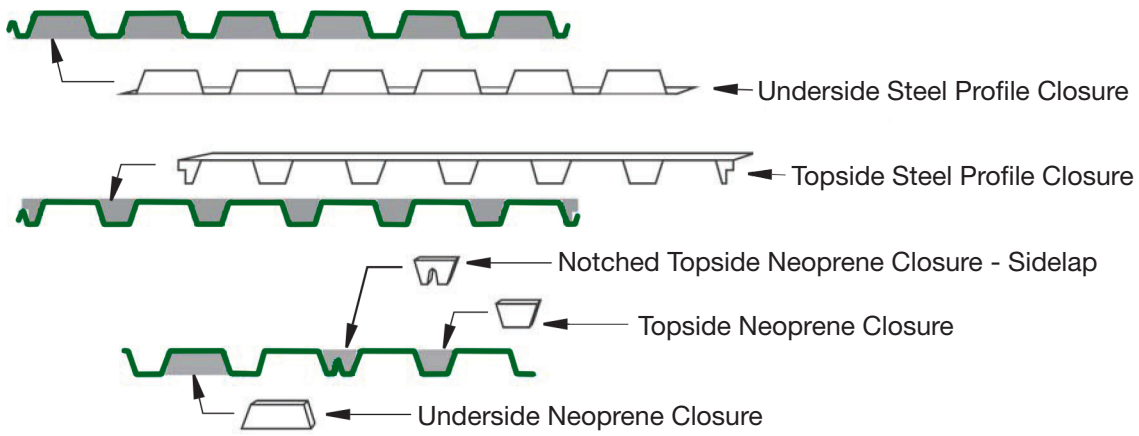
VERCO DECK ACCESSORIES
ASTM 653 F_y = 33 ksi, F_u = 45 ksi and G60 min

PROFILE CLOSURES

Profile closures made from steel or neoprene are designed to fit Verco's deck products. See Table 1 for availability of closures by deck profile. Steel closures are 22 gage with a 1 in. return lip for fastening to deck with screws or tack welds. Neoprene closures for decks are 1 in. thick individual plugs. Neoprene closures for VERCOR decks are 1 in. thick, 36 in. long strips. These closures are not intended to be used as concrete closures or stops.

Availability of Profile Closures

Deck Profile	Steel Closures		Neoprene Closures	
	Underside	Topside	Underside	Topside
PLB-36 / HSB-36	✓	✓	✓	✓
PLN3 / HSN 3	✓	✓	✓	✓
PLW2 or W2 FORMLOK	✓	✓	✓	✓
PLW3 or W3 FORMLOK	✓	✓	✓	✓
2.0D or 2.0D FORMLOK			✓	✓
3.5D or 3.5D FORMLOK			✓	✓
Deep VERCOR (DV)			✓	✓
Shallow VERCOR (SV)			✓	✓

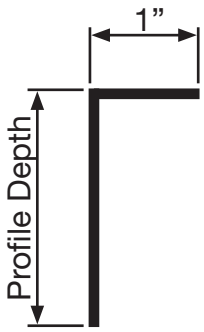


Note: PLB or B deck and closures shown; closures for other profiles are installed similarly.

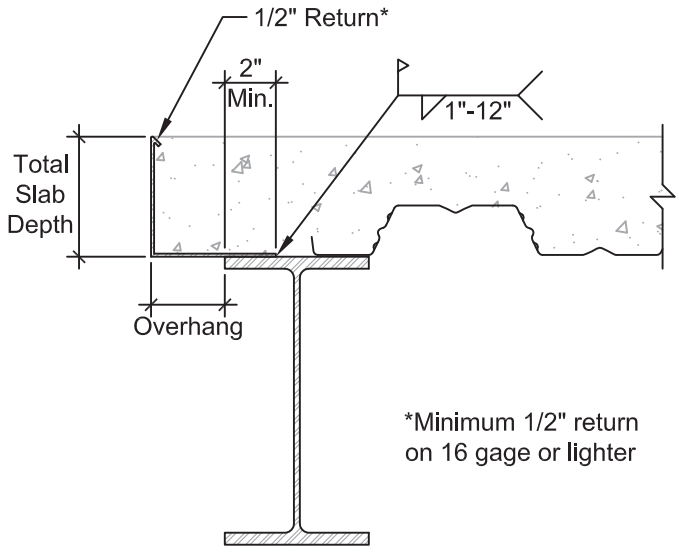
END CLOSURES / BREAK-FORMED ACCESSORIES

Standard steel end (cell) closures are available for all profiles. End closures for 1½" deep decks are 22 gage, closures for 2" and deeper decks are 20 gage.

Consult your Verco District Sales Manager regarding the availability of non-standard accessories.



POUR STOP / EDGE FORM SUGGESTIONS



The edge form gages shown in table below are provided as suggestions, but do not preclude the use of different gages based on alternate criteria.

Edge Form Gage Selection [1,3,4]

Total Slab Depth[2]	Overhang								
	2"	3"	4"	5"	6"	7"	8"	9"	10"
4"	18	18	16	14	12	12	12	10	10
4½"	18	18	16	14	12	12	12	10	10
5"	18	18	16	14	12	12	12	10	10
5½"	18	16	16	14	12	12	10	10	10
6"	18	16	14	14	12	12	10	10	
6½"	18	16	14	12	12	12	10	10	
7"	16	16	14	12	12	12	10	10	
7½"	16	14	14	12	12	10	10		

Notes:
1. Steel edge form minimum yield strength F_y = 33 ksi.
2. Normal weight concrete (145 pcf).
3. 100 psf superimposed load on overhang.
4. For overhangs greater than those shown, additional support or bent plates suggested.

Suspended Gypsum Board Ceiling

Floor Covering	Underlayment	STC	IIC	Intertek Test No.
Ceramic Tile	5 mm ECOsilence	**62**	**60**	I5133.01

Note:

1. Laboratory tests determining STC and IIC for Dovetail FormLok deck with a suspended ceiling were conducted with ceramic tile and underlayment. Adding a suspended ceiling to the ceramic tile assembly improved the STC rating by 11 and the IIC rating by 19 compared to an assembly with no ceiling. Other flooring types can expect similar improvement in performance.

2.0D DOVETAIL FORMLOK® DECK-SLAB

Notes:

1. The acoustical test reports with complete assembly details are available from vercodeck.com.

2. The testing was performed in accordance with the following standards:
   - **ASTM E90-09 (2016)**, *Standard Test Method for Laboratory Measurement of Airborne Sound Transmission Loss of Building Partitions*
   - **ASTM E492-09(2016)e1,** *Standard Test Method for Laboratory Measurement of Impact Sound Transmission Through Floor-Ceiling Assemblies Using the Tapping Machine*

DOVETAIL DECK
FINISH SOLUTIONS

MULTIPLE DOVETAIL DECK FINISHES PROVIDE FREEDOM TO CHOOSE THE RIGHT SOLUTION FOR YOUR PROJECT

VISION ↓	SPECIFY ↓	SOLUTION ↓
Accentuate the sleek lines of Dovetail deck with factory applied standard white finish paint or the custom color of your choice.	**Enhanced 2-coat polyester paint**	Enhanced 2-Coat polyester paint is factory applied to chemically cleaned and pre-treated G90 galvanized steel prior to roll forming steel deck. Select from manufacturer's standard off-white (Sherwin-Williams PMW7512) or a wide range of custom colors. Deck is packaged to protect factory applied finish during shipment. Color-matched aerosol touch-up paint is available.
Follow your vision, choose any color or texture imaginable with the field applied finish paint system of your choice on Dovetail deck.	**Primer Paint**	Factory applied oven-cured polyester primer paint on chemically cleaned and pre-treated G90 galvanized steel ensures a high quality finish. Primer paint provided in manufacturer's standard off-white color. This paint is intended to be field coated. It is recommended that compatibility of field applied finish paint with factory applied primer paint be established prior to application of finish paint system.
Capture the industrial-retro feeling with an exposed metallic G-90 finish on Dovetail deck.	**G90 Galvanized**	ASTM A653 SS Grade 40 (min.) steel with G90 galvanized coating.
Protect the Dovetail deck in natatoriums and other demanding (harsh, humid, corrosive) environments.	**Tnemec or Sherwin-Williams field applied coatings with Enhanced 2-coat polyester paint**	The High Performance Paint solution utilizes the factory applied Enhanced 2-Coat polyester paint in combination with field applied Tnemec or Sherwin-Williams finishes designed specifically for demanding (harsh, humid, corrosive) environments. Contact us for suggested field finish specifications.

DOVETAIL DECK
COATING SYSTEM

DOVETAIL DECK COATING SOLUTIONS BY SHERWIN-WILLIAMS

Created to withstand most anything that comes its way, our specially formulated polyester coating is designed to go where it will be abused—maintaining extreme resistance to abrasion, chipping and marring with tremendous color and gloss retention.

VULCRAFT/VERCO GROUP

They continue to build their reputation as the leading producer of steel deck, providing architectural deck as a part of your structural steel package.

COATING APPLICATIONS

- Gymnasiums
- Auditoriums
- Schools
- Commercial and residential interior use

SUBSTRATES

A653 and A1063 Hot-Dipped Galvanized (HDG) Steel with G90 coating.

COLORS

Dovetail steel deck is available in a standard white, color code PMW7512. Custom colors are available but a minimum order size will apply. Contact your Verco sales office for information and lead times.

TOUCHUP COATING

Field applied color-matched aerosol touchup to repair scratches and nicks of factory applied coatings available through your local Sherwin-Williams supplier.

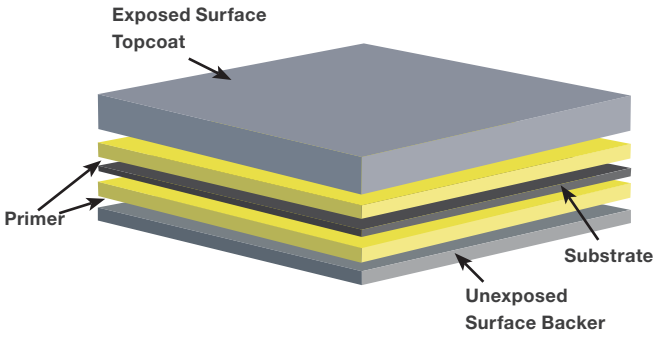
DOVETAIL DECK COATING SYSTEM

COMMITMENT TO QUALITY

Dovetail Deck coatings are proven through rigorous performance testing.



POLYESTER COIL COATING SYSTEM

Number of Coats	Dry Film Thickness (DFT)		Total Exposed DFT:	
	Primer	Exposed Surface Topcoat		Unexposed Backer
2-Coat	0.2–0.3 mils	0.7-0.8 mils	0.9-1.1 mils	0.3–0.4 mils

PERFORMANCE TESTING	
Application Method	Factory applied continuous coil coating process
Substrate	Hot-Dipped Galvanized (HDG) steel

PHYSICAL TESTING	ASTM[1] TEST METHOD	TEST RESULT
Film Adhesion	ASTM D3359	No removal of film under tape in the cross-hatched area. (Dry, Wet, Boiling Water)
Surface Burning Characteristics	ASTM E84-18A	Flame Spread Index: 0
Humidity Resistance	ASTM D 2247: 100% RH at 100° F for 2,000 hours	No field blisters
Impact Resistance (direct)	ASTM D2794	3X metal thickness inch-pound, no loss of adhesion
Pencil Hardness	ASTM D3363	F minimum.
Salt Spray	ASTM B117: 1,000 Hours	Creep from scribe = 1.5mm and edge = 4.5mm, no surface blistering #10 rating
Specular Gloss 60°	ASTM D523	15-50
T-Bends	ASTM D4145[2]	2T, no loss of adhesion.

[1]American Society for Testing and Materials. [2]Coatings are not designed to bridge cracks in the substrate. The coatings provided with Verco/Vulcraft deck will generally meet the requirements for most post-painted fabrication processes. However, variations in metal quality, thickness or cleaning/pretreatment applications can lead to diminished flexibility in the coating.

For details and health, safety and handling information, Material Safety Data Sheets (MSDS) are available at coil.sherwin.com.

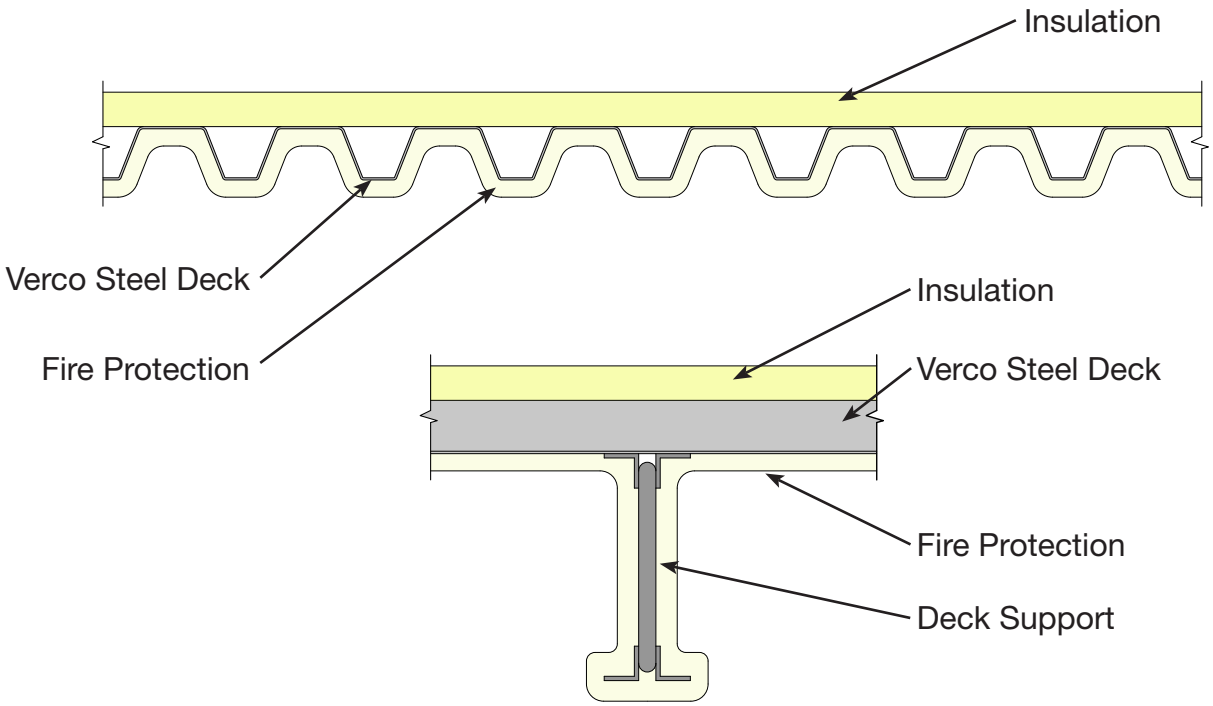
USE UL RECOGNIZED VERCO ROOF DECKS FOR YOUR FIRE RATED ASSEMBLIES

- **Verco steel decks may be used in assemblies which are required to meet hourly fire ratings. Approved hourly fire rated assemblies are a combination of specific proprietary materials as listed in UL fire resistance ratings.**



Refer to the table below for a listing of UL fire-rated assemblies utilizing Verco steel deck profiles. Refer to the particular UL assembly being considered for full details of construction, including specific information about fill or fireproofing thicknesses and span limitations.

UL Fire Resistance Ratings

Restrained Assembly Ratings (hr.)	UL Design No.	Unrestrained Assembly Ratings (hr.)	Support Type	Fire Protection	Insulation Type	Deck Type

Notes:

1. Refer to the UL “Fire Resistance Directory” for necessary construction details.

2. “B” = PLB-36 and HSB-36, PLB-36 and B-36 FormLok
   “N3” = PLN3-32 and HSN3-32, PLN3-32 and N3-32 FormLok
   “W2” = PLW2-36 and W2-36 FormLok
   “W3” = PLW3-36 and W3-36 FormLok
   “SV” & “DV” = Shallow Vercor or Deep Vercor, respectively
   “D” = 2.0D & 3.5D Dovetail Deck

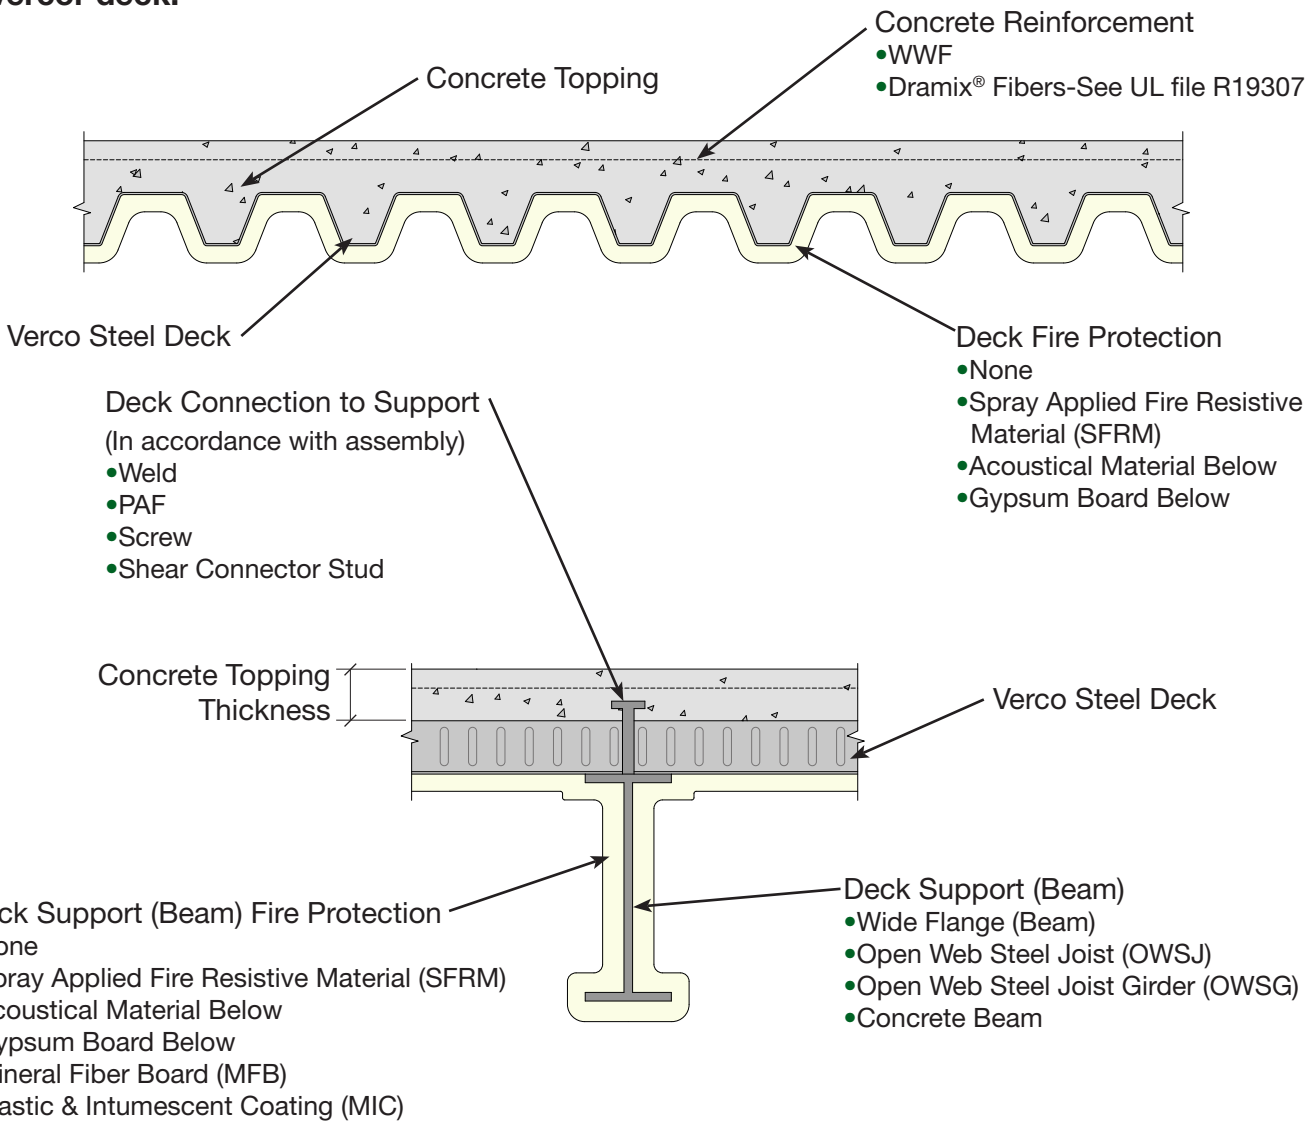
3. UL recognized Verco gray primer paint on bare (un-galvanized) steel deck or galvanized steel deck may be used with spray-applied fire resistive material (SFRM) as noted in the protected assemblies listed above.

4. UL recognized Verco gray primer paint on bare (un-galvanized) steel deck or galvanized steel deck may be used in unprotected assemblies. Verco recommends the use of galvanized steel deck when using insulating fill due to potential corrosion issues.

VERCO® COMPOSITE & NON-COMPOSITE DECK
UL FIRE RATED ASSEMBLIES

USE UL RECOGNIZED FORMLOK® AND VERCOR® DECKS FOR YOUR FIRE RATED ASSEMBLIES WITH STRUCTURAL CONCRETE FILL

- **Verco FormLok composite and Vercor non-composite slabs may be used to meet hourly fire ratings. The type and thickness of concrete specified will generally determine whether fireproofing will be required on the underside of the FormLok or Vercor deck.**



REPRESENTATIVE FIRE RATED ASSEMBLY

The table on the following pages lists the UL fire rated assemblies that include Verco FormLok and Vercor decks profiles. This summary table is provided to assist in identification of assemblies to meet specific project requirements. Refer to the particular UL assembly for full details of construction including, specific information about concrete slab, framing, type of fire protection, deck types and span limitations.

Notes:

1. Refer to the UL "Fire Resistance Directory" for complete assembly requirements.

2. "B" = PLB-36 and B-36 FormLok
   "BR" = BR-36 FormLok
   "N3" = PLN3-32 and N3-32 FormLok
   "W2" = PLW2-36 and W2-36 FormLok
   "W3" = PLW3-36 and W3-36 FormLok
   "SV" & "DV" = Shallow Vercor or Deep Vercor, respectively
   "2.0D" = 2.0D FormLok Dovetail Deck
   "3.5D" = 3.5D FormLok Dovetail Deck

3. "SFRM" = Spray-Applied Fire Resistive Materials
   "MFB" = Mineral Fiber Board
   "MIC" = Mastic and Intumescent Coating

4. Verco steel decks in the assemblies listed above may be galvanized or painted, excluding assemblies D904, D917, D928, D947, D961, D964, and D984 which shall be galvanized only. Painted deck is bare (un-galvanized) steel deck with UL recognized Verco gray primer paint on the bottom side only.

5. Galvanized decks with UL recognized Verco gray primer paint on the bottom side only are approved for use in limited fire-rated systems. Refer to specific UL assemblies for complete information.

6. Cellular versions of the Verco steel decks in the assemblies listed above may be used, excluding assemblies D742, D750, D754, D760, D771, D775, D777, D779, D780, D782, D798, D904, D917, D924, D928, D947, D961, D964, D969, D973, D981, D984, D996, E707 and G710 which shall be non-cellular decks.

7. Cellular acoustical versions of the Verco steel decks may be used in all listed D9xx assemblies except D904, D917, D924, D928, D947, D961, D964, D969, D973, D981, D984, D996, and all listed Gxx assemblies except G710.

8. Topping thickness varies based on selected acoustical material.

9. Carbonate Aggregate Normal Weight Concrete

10. Siliceous Aggregate Normal Weight Concrete

11. For G710, the 1 hr rating, concrete topping thickness may be reduced to 2½ in. when composite or non-composite joist are used. For 1½ or 2 hr ratings, concrete topping thickness may be reduced to 2½ in. when non-composite joist are used.

12. Dramix® fibers may be used in UL or ULC fire rated assemblies in lieu of WWR. See UL file R19307 for additional information.

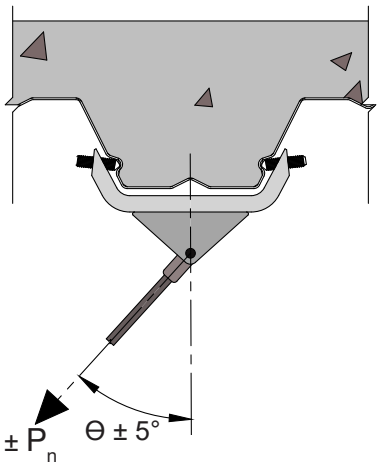
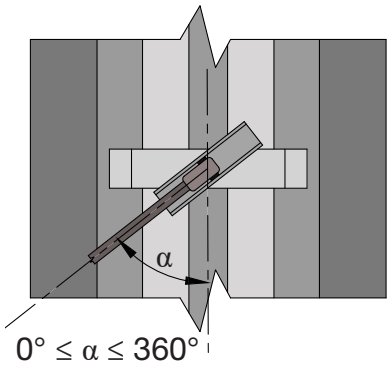
NDH4S-W3	3/8	4	by analysis
	1/2	6	
	5/8	6	





Notes:

1. The strength of the FormLok Composite steel deck-slab, Badger No-Drill Hanger, or threaded rod, bolt, and other connecting hardware shall be equal or greater than the governing load combination as stipulated in the IBC or ASCE/SEI 7 including the fire sprinkler system loading.
2. The effect of connection spacing interaction, between the Badger NDH4S-W3 connections and any other connections to the composite steel-deck slab shall be considered.
3. Sprinkler pipe sizes at maximum hanger spacing conform to NFPA 13 based on the individual NDH4S-W3 connection strength without the effects of spacing interaction.
4. Badger No-Drill Hanger IAPMO recognized strengths published in this document are applicable to Verco FormLok deck manufactured after 6/21/2022.
5. Badger hangers shall be installed and inspected in accordance with manufacturer's instructions.

Standard Features

- ASTM A653 SS GR50 Min., with G60 or G90, white or gray primer optional
- ASTM A1008 SS GR50 Min. with gray primer
- Standard lengths – 6'-0" to 40'-0"
- IAPMO UES ER-2018, UL, and FM Listed
- Tables conform to ANSI/SDI RD-2017

Optional Features

- Inquire regarding cost and lead times for:
  - -Short cuts < 6'-0"
  - -Sheet Lengths > 40'-0"
  - -Alternative metallic and painted finishes
- Web and Fully Perforated Acoustical Versions
- HSB-30-NS Deck used with Side-lap screws

Standard Features

- ASTM A653 SS GR 40 Min. with G90
- Standard lengths – 6'-0" to 42'-0"
- Tables conform to ANSI/SDI C-2017
- IAPMO UES ER-423 and UL Listed

Optional Features

- Inquire regarding cost and lead times for:
  - -19 gage
  - -Short cuts < 6'-0"
  - -Alternative metallic and painted finishes

Standard Features

- ASTM A653 SS GR50 Min., with G60 or G90, white or gray primer bottom optional
- ASTM A1008 SS GR50 Min. with gray primer bottom
- Standard lengths – 6'-0" to 40'-0"
- IAPMO UES ER-2018 and UL Listed
- Tables conform to ANSI/SDI C-2017

Optional Features

- Inquire regarding cost and lead times for:
  - -Short cuts < 6'-0"
  - -Sheet Lengths > 40'-0"
  - -Alternative metallic and painted finishes
- Factory Vent Tabs

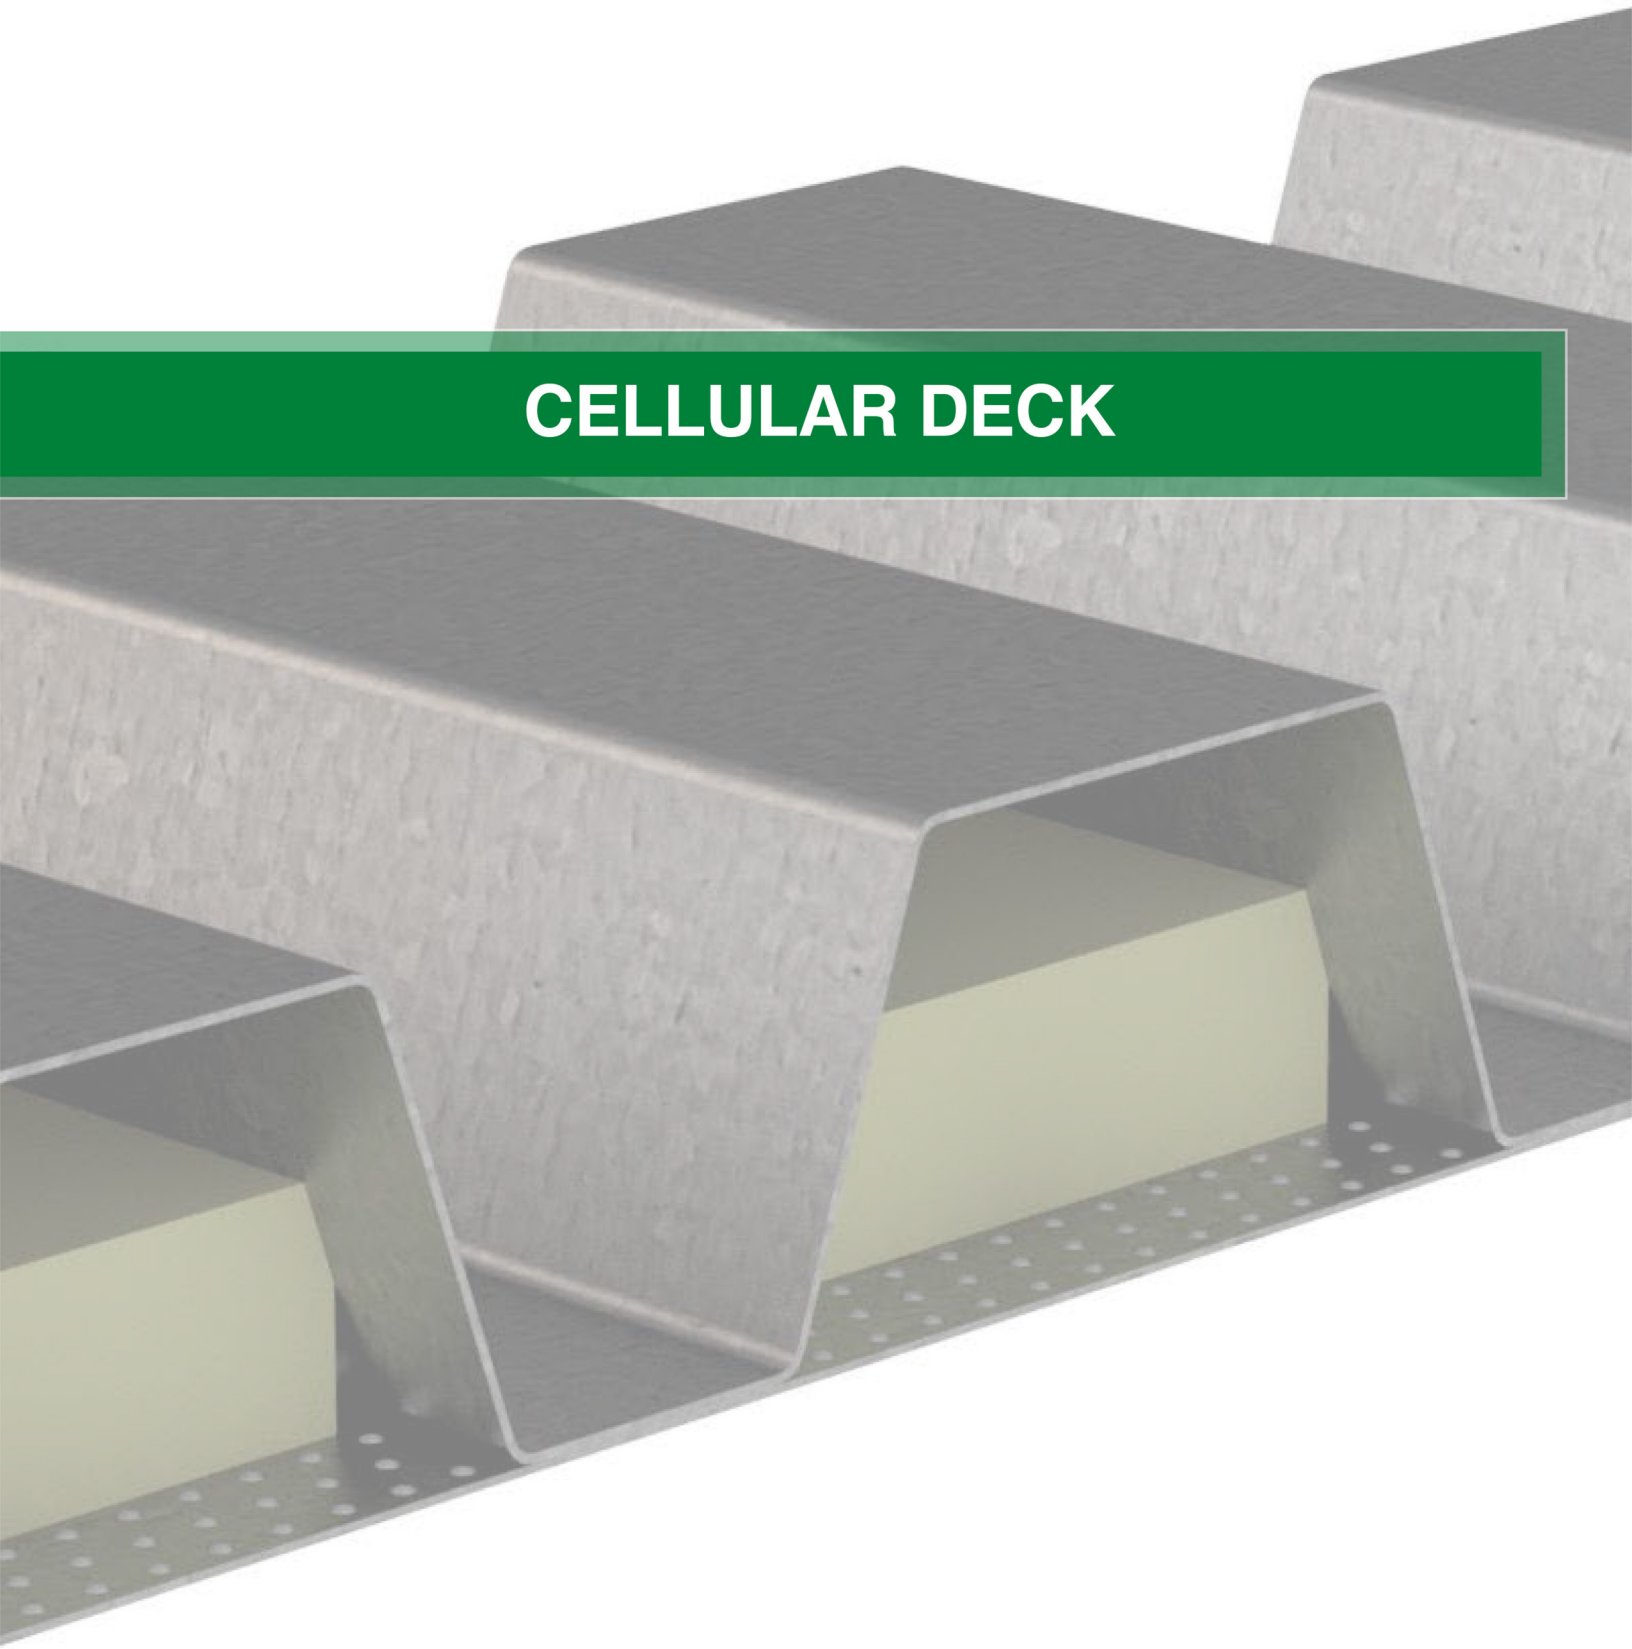
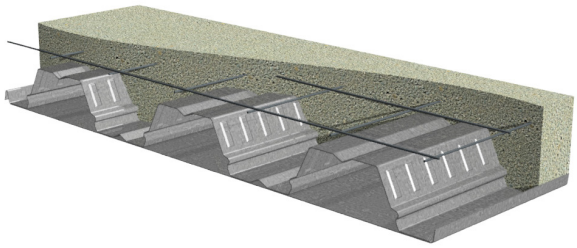
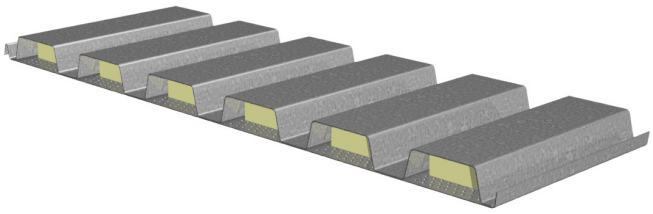
CELLULAR DECK



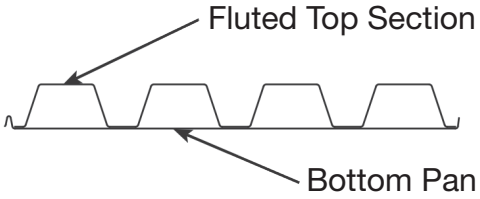
CELLULAR DECK DESIGN GUIDANCE





CELLULAR DECK DESIGN

Cellular and cellular acoustical decks may be designed for out-of-plane loads, shoring and diaphragm loads based on the published properties. Superimposed loads are based on the profile and gage of the fluted top section.



Cellular and cellular acoustical decks may be designed based on their fluted top sections ignoring the contribution of the bottom pan, in accordance with the guidelines below. Please contact your Verco representative if more detailed information is required.

Cellular Roof Decks

- Out-of-Plane Loads: Cellular and cellular acoustical decks may be designed for out-of-plane loads based on fluted deck of the same gage and profile as the fluted top section of the cellular deck.
- Diaphragm Design: Diaphragm shear strength and stiffness for cellular and cellular acoustical decks may be based on fluted deck of the same profile as the fluted top section but with the gage of the bottom pan.

Cellular FormLok® Composite Decks

- Unshored Clear Spans: Determination of maximum unshored clear spans of cellular and cellular acoustical decks may be based on fluted deck of the same gage and profile as the fluted top section of the cellular deck.

Cellular FormLok® Composite Deck-Slabs

- Superimposed Loads: Superimposed loads for FormLok cellular and cellular acoustical composite decks with a given concrete type and thickness are based on FormLok composite deck of the same profile, gage and concrete as the fluted top section of the FormLok cellular deck.
- Diaphragm Design: Diaphragm shear strength and stiffness for FormLok cellular and cellular acoustical composite decks with a given concrete type and thickness may be based on fluted FormLok composite deck of the same profile as the fluted top section but with the gage of the bottom pan.

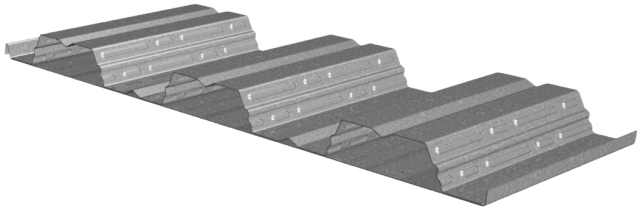
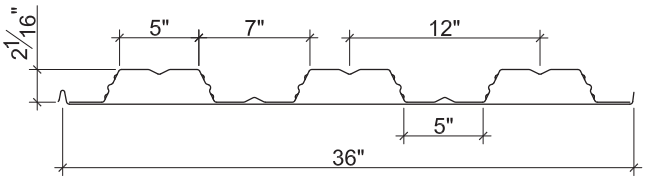
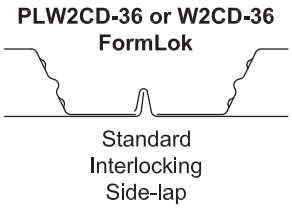
W2 CELLULAR FORMLOK® COMPOSITE DECK

- **PLW2CD-36 FormLok Deck used with PunchLok® II System**
- **W2CD-36 FormLok Deck used with TSWs or BPs**



Nominal Dimensions





Section Properties

Deck Gage	Deck Weight w_{dd} (psf)	Base Metal Thickness t (in.)	Yield Strength F_y (ksi)	Effective Moment of Inertia at Service Load $I_d = (2I_e+I_g)/3$ I_d+ (in⁴/ft)	I_d- (in⁴/ft)	Effective Section Modulus at F_y = 50 ksi S_e+ (in³/ft)	S_e- (in³/ft)	Vertical Web Shear øVn (lb/ft)	Vertical Shear øVn End (lb/ft)	Vertical Shear øVn Interior (lb/ft)

Standard Features

- ASTM A653 SS GR50 Min., with G60
- Standard lengths – 7'-6" to 30'-0"
- IAPMO UES ER-2018 and UL Listed
- Tables conform to ANSI/SDI RD-2017 and C-2017

Optional Features

- Inquire regarding cost and lead times for:
  - -Sheet Lengths > 30'-0"
  - -Alternative metallic finishes
- Cellular Acoustical Versions

PLW2CD/W2CD CELLULAR DECK
GRADE 50 STEEL

ASD

W2 CELLULAR FORMLOK® COMPOSITE DECK

- **PLW2CD-36 FormLok Deck used with PunchLok® II System**
- **W2CD-36 FormLok Deck used with TSWs or BPs**
